PROGRAMME OVERVIEW

The broad aim of the **Master of Science in Innovative Education & Teaching** is to prepare a more able, efficient, internationally oriented, skilled teaching force. The programme's aim at equipping teachers with necessary knowledge and skills, as well as inculcate continuing education mindset to enable them to a) engage in best practices to maximize learning outcomes, b) employ sound educational theories and principles in day-to-day teaching and related tasks, c) provide creative and flexible opportunity to teachers who are busy, but nevertheless wish to gain an internationally recognized teaching credential to further boost their professional careers in education, d) contribute to the overall quality of education by becoming professionally attuned to wide range of effective educational practices, by identifying and discarding those that are not effective, and e) be part of a bigger group of professional teacher network that make up a constructive community of learners aimed at advancing the cause of good education for all, locally and internationally.

LEARNING OUTCOMES

- Develop comprehensive understanding about educational and psychological theories, principles and concepts that directly or indirectly affect teaching and learning
- Critically analyze and verify the application of such theories, principles and concepts in one's own day-to-day teaching practices
- Construct models and plan strategies aimed at improving curriculum delivery
- Employ assessment techniques that are in alignment with teaching approaches and pedagogic soundness
- Develop a sound educational philosophy that would be reflected in every thought pattern, action plan and execution of lessons
- Evaluate contemporary educational ideas and practices and critically examine their relevance, appropriateness, and benefit to improving student learning and achievement
- Embrace, practice and advocate for educational best practices that maximize teacher satisfaction and students' success in learning
